RESULT 91

US-09-996-288-234

Sequence 234, Application US/09996288

Patent No. US20020177126A1

GENERAL INFORMATION:

APPLICANT: Young, James
APPLICANT: Scott, Koenig

APPLICANT: Leslie, Johnson

TITLE OF INVENTION: Methods of Adminstering/Dosing.
TITLE OF INVENTION: and Treatment
FILE REFERENCE: 10271-047-999

CURRENT APPLICATION NUMBER: US/09/996,288

CURRENT FILING DATE: 2001-11-28

Anti-RSV Antibodies for Prophylaxi

```
Sequence 236, Application US/09996288

Patent No. US2002017126A1

GENERAL INFORMATION:
APPLICANT: Young, James
APPLICANT: Young, James
APPLICANT: Scott, Koenig
APPLICANT: Leslie, Johnson
ITILE OF INVENTION: Methods of Adminstering/Dosing Ant
FILE OF INVENTION: and Treatment
FILE REFERENCE: 10271-047-999

CURRENT APPLICATION NUMBER: US/09/996,288

CURRENT FILING DATE: 2001-11-28

NUMBER OF SEQ ID NOS: 259

SOFTWARE: PStentIn version 3.1

SEQ ID NO 236

LENGTH: 450

Type: PAT
ORGANISM: Homo sapiens

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 242, Application US/09996288

Patent No. US30020177126A1

GENERAL INFORMATION:
APPLICANT: Young, James
APPLICANT: Scott, Koenig
APPLICANT: Scott, Koenig
APPLICANT: Itelie, Johnson
TITLE OF INVENTION: Methods of Adminstering/Dosing Anti-RSV Antibodies for Prophylaxi
TITLE OF INVENTION: and Treatment
FILE REFERENCE: 10271-047-999
CURRENT APPLICATION NUMBER: US/09/996,288
CURRENT FILING DATE: 2001-11-28
NUMBER OF SEQ ID NOS: 259
SOPTWARE: Patentin version 3.1
SEQ ID NO 242
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      TYPE: PRT
ORGANISM: Homo sapiens
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          LENGTH: 450
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Local Similarity

Sequence 244, Application US/09996288
Patent NO. US20020177126A1
GENERAL INFORMATION:
APPLICANT: Young, James
APPLICANT: Scott, Koenig
APPLICANT: Leslie, Johnson
TITLE OF INVENTION: Methods of Adminstering/Dosing And
TITLE OF INVENTION: and Treatment
FILE REFERENCE: 10271-047-999
CURRENT APPLICATION UMBER: US/09/996,288
